Objective

Ambitious developer eager to learn and adapt new things while enhancing soft skills. Seeking opportunities to grow as a fullstack developer in the short term, with the long-term goal of advancing from fullstack development into solution architecture.

Skills

- **Technical Skill**
  - **Frontend:** HTML, CSS, JavaScript, TypeScript, ReactJS, Next.js, React Native, Angular
  - **Backend:** NestJS, Express.js
  - **Databases:** MongoDB, SQL
  - **Cloud & Services:** AWS (S3, EC2), GCP, Firebase, Stripe, Google/Apple Payment, OpenAI
  - **AI Tools & Research:** experience using AI tools to support research, problem-solving, and development tasks
  - **Version control:** Git
  - **Tools & Practices:** Agile/Scrum

- **Soft Skills**
  - **Multi-tasking:** managed multiple coding tasks concurrently while ensuring timely delivery
  - **Time management:** prioritized assignments effectively to meet deadlines consistently
  - **Teamwork:** collaborated closely with developers, designers, testers and managers for smooth workflows
  - **Problem-solving:** identified and resolved coding challenges efficiently to improve project outcomes
  - **Adaptability:** quickly learned new technologies and adjusted to evolving project needs

- **Language**
  - **English:** able to communicate in discussions, write technical documents, and research effectively

Experience

TechJDI
Software Developer   June 2022 - September 2025

- **Accumulus AI**
  - Contributed to development of a web and mobile platform providing airline pilots and operations staff with centralized, real-time operational and contextual information
  - Collaborated with other team members to clarify requirements, refine prototypes, and deliver production-ready features
  - Improved application stability and performance by assisting in debugging and resolving lagging issues
  - Applied user and stakeholder feedback to enhance usability and proposed ideas that influenced product improvements

- **TechJDI / TalentJDI**
  - Delivered customizable landing pages for marketing campaigns, enabling non-technical staff to update content and layouts independently.

- Maintained and monitored the production servers, ensuring the site was reliable and issues were resolved promptly.
- Adapted to fast-paced marketing timelines by consistently delivering features to support campaigns and events

- **Optimal Vest**
  - Contributed to development of a fintech platform enabling clients to manage financial situations and receive AI-powered investment guidance via chatbot
  - Designed and implemented backend services and database structures, gaining deeper experience in system architecture and data management
  - Built CRM admin panel to allow clients to edit and manage statistical data driving investment calculations

- **[JDI Central](#)**
  - Contributed to building a web-based marketplace connecting freelancers, agencies, and employers from project inception
  - Created the initial project structure and front-end foundation to support scalable feature development
  - Guided interns by providing support and reviewing their work throughout the development process

- **[Lylo](#)**
  - Contributed to the launch of a rental car marketplace app allowing users to search, book, and receive cars at their chosen location
  - Set up the initial repository, configured development and staging environments, and established deployment workflow to support mobile app development
  - Participated in client demo meetings to present progress, clarify requirements, and align on product improvements
  - Gained hands-on experience in mobile development practices, enhancing both technical and communication skills

- **Blimobil**
  - Involved in developing an online marketplace enabling buyers to purchase used cars from dealers and dealers to acquire new cars from suppliers
  - Contributed to building a mobile app for dealers and buyers, enhancing accessibility and user engagement
  - Supported development of a CRM system for administrators to manage user orders efficiently
  - Set up and maintained server environments, including deployment and SSL configuration, ensuring secure and reliable connection

- **[ReferReach](#)**
  - Maintained and enhanced a cross-platform mobile and web application designed to connect users through communities and referrals
  - Resolved bugs and implemented new features to improve user experience
  - Built a CRM admin panel enabling clients to manage users and track behavior for data-driven strategic decisions
  - Collaborated with team members and clients to deliver requested features, ensuring the platform met evolving business and user needs

- **Simply Wealth**
  - Contributed to a fintech platform enabling financial advisors to manage client portfolios with automated calculations and interactive visualizations
  - Formatted financial data into clear, dynamic charts and implemented new features to enhance user experience
  - Participated in performance optimization, improving responsiveness and stability of the platform
  - Collaborated in Agile workflow, presenting features to clients, receiving feedback, resolving issues, and delivering continuous enhancements through regular updates to staging environment

Phuong Nam Digital
Intern Frontend Developer   April 2022 - June 2022

- **Landing page**
  - Developed course-introduction landing page using pure HTML, CSS, JavaScript
  - Convert Photoshop designs into pixel-perfect, responsive layouts
  - Implemented tasks under senior developer guidance and successfully contributed to final site delivery

- **Education Web App**
  - Developed single-page application enabling test creation and student participation
  - Integrated backend APIs; tested, debugged, and resolved issues under senior developer guidance
  - Streamlined task delivery by following structured development workflow, ensuring timely feature completion

Education

University of Science
Bachelor, Software Engineering – GPA: **3.39/4.0**
Graduated: **November 2023**
Graduation project: **Job Marketplace**
- Developed a web-based platform connecting students with job opportunities from companies, including automated matching based on defined attributes
- Built admin portal for managing companies, students, and interview question banks covering coding, writing, and multiple-choice assessments
- Enabled companies to integrate assessments into job postings, requiring candidates to complete tests before applying
- Engaged in weekly faculty meetings to align on progress and improvements, strengthening skills in collaboration, task delegation, and managing deadlines
