Objective

Software developer with 3+ years of experience delivering scalable web and mobile applications across fintech, aviation, and e-commerce. Skilled in React and React Native. Seeking opportunities to grow as a fullstack developer in the short term, with the long-term goal of advancing from fullstack development into solution architecture.

Skills

- **Technical Skill**
  - **Frontend:** HTML, CSS, JavaScript, TypeScript, ReactJS, Next.js, React Native, Angular
  - **Backend:** NestJS, Express.js
  - **Databases:** MongoDB, SQL
  - **Cloud & Services:** Cloud (AWS, GCP, Firebase), Payments (Stripe, Google/Apple Pay), AI Integration (OpenAI)
  - **AI Tools & Research:** experience using AI tools to support research, problem-solving, and development tasks
  - **Tools & Practices:** Agile/Scrum

- **Soft Skills**
  - **Multi-tasking:** managed multiple coding tasks concurrently while ensuring timely delivery
  - **Time management:** prioritized assignments effectively to meet deadlines consistently
  - **Teamwork:** collaborated closely with developers, designers, testers and managers for smooth workflows
  - **Problem-solving:** identified and resolved coding challenges efficiently to improve project outcomes
  - **Adaptability:** quickly learned new technologies and adjusted to evolving project needs

- **Language**
  - **English:** able to communicate in discussions, write technical documents, and research effectively

Experience

TechJDI
Software Developer   June 2022 - September 2025

- [**Accumulus AI**](#)
  - Built core features for a real-time aviation platform used by pilots and operations staff, centralizing flight data and improving decision-making efficiency
  - Collaborated with other team members to clarify requirements, refine prototypes, and deliver production-ready features
  - Reduced app crashes through debugging memory leaks and optimizing rendering performance.
  - Applied user and stakeholder feedback to enhance usability and proposed ideas that influenced product improvements

- **TechJDI / TalentJDI**
  - Delivered customizable landing pages for marketing campaigns, enabling non-technical staff to update content and layouts independently.
  - Maintained and monitored the production servers, ensuring the site was reliable and issues were resolved promptly.
  - Adapted to fast-paced marketing timelines by consistently delivering features to support campaigns and events

- **Optimal Vest**
  - Developed backend services powering an AI-driven investment chatbot, enabling clients to manage portfolios with personalized guidance.
  - Designed and implemented backend services and database structures, gaining deeper experience in system architecture and data management
  - Built CRM admin panel to allow clients to edit and manage statistical data driving investment calculations

- **JDI Central**
  - Contributed to building a web-based marketplace connecting freelancers, agencies, and employers from project inception
  - Created the initial project structure and front-end foundation to support scalable feature development
  - Guided interns by providing support and reviewing their work throughout the development process

- **Lylo**
  - Built and deployed a mobile rental platform from scratch, enabling users to search, book, and rent cars; set up repository, environments, and deployment workflow.
  - Collaborated with clients in demo sessions to refine requirements and improve product delivery.

- **Blimobil**
  - Involved in developing an online marketplace enabling buyers to purchase used cars from dealers and dealers to acquire new cars from suppliers
  - Contributed to building a mobile app for dealers and buyers, enhancing accessibility and user engagement
  - Supported development of a CRM system for administrators to manage user orders efficiently
  - Set up and maintained server environments, including deployment and SSL configuration, ensuring secure and reliable connection

- **ReferReach**
  - Maintained a cross-platform app by resolving bugs and shipping new social features that increased engagement.
  - Built a CRM dashboard with analytics for clients to manage users and track behavior.
  - Partnered with clients and teammates to deliver evolving business needs.

- **Simply Wealth**
  - Developed a financial advisor platform with automated portfolio calculations and interactive charts.
  - Optimized performance and stability, improving responsiveness and user experience.
  - Collaborated in Agile workflow, presenting updates to clients and delivering enhancements regularly.

Phuong Nam Digital
Intern Frontend Developer April 2022 - June 2022

- **Landing page**
  - Developed course-introduction landing page using pure HTML, CSS, JavaScript
  - Convert Photoshop designs into pixel-perfect, responsive layouts
  - Implemented tasks under senior developer guidance and successfully contributed to final site delivery

- **Education Web App**
  - Developed single-page application enabling test creation and student participation
  - Integrated backend APIs; tested, debugged, and resolved issues under senior developer guidance
  - Streamlined task delivery by following structured development workflow, ensuring timely feature completion

Education

University of Science
Bachelor, Software Engineering – GPA: **3.39/4.0**
Graduated: **November 2023**
Graduation project: **Job Marketplace**
- Built a job marketplace platform with automated candidate matching and integrated assessments. Designed an admin portal to manage companies and applicants.
- Engaged in weekly faculty meetings to align on progress and improvements, strengthening skills in collaboration, task delegation, and managing deadlines
